LANGUAGES SPOKEN

Bengali — Native
English — Conversational
Hindi — Conversational

JAWAD HOSSAIN MAHI

FULL STACK DEVELOPER • PRODUCT BUILDER • CS UNDERGRADUATE

PROFESSIONAL SUMMARY

Resourceful Full Stack Developer with hands-on industry experience building scalable, user-centric web applications, and a founder's mindset — currently building EduSelf, a multi-school management software product live in production. Proficient across the full stack, from responsive frontends with React.js, Next.js and Tailwind CSS to robust backends with Laravel and CodeIgniter. Active in university tech leadership through GUCC and GUBCPC, blending strong Data Structures & Algorithms fundamentals with real-world product delivery.

PROFESSIONAL EXPERIENCE

Full Stack Developer — Webshinez Technologies

- ▶ Developed and maintained dynamic web applications ensuring efficient performance and scalability, spanning both frontend (React.js/Vite) and backend (Laravel) work.
- ▶ Built Markaj U Talimis Sunnah, a full-stack institutional platform (Vite + React.js frontend, Laravel backend) with Bootstrap, jQuery, Swiper, and Owl Carousel for a rich UI/UX.
- ▶ Contributed to EduSelf LMS, a Laravel-based multi-school, multi-branch system covering authentication, academics, accounting, exams, homework, HRM, and student portals.

FEATURED PROJECTS

EduSelf — School Management Software (Own Product) | Founder & Full Stack Developer

Tech: Laravel, React.js, TypeScript, Bootstrap, jQuery, Yajra DataTable, REST APIs

Live: eduself.top

- ▶ Designed and built a full multi-school, multi-branch School Management System covering Core, HRM, Accounting, Frontend, Academic, and Exam modules with student dashboards and secure authentication.
- ▶ Now developing a dynamic React + TypeScript frontend module consuming Laravel REST APIs for real-time academic, accounting, and student data with type-safe, reusable components.

Webshinez Technologies Website | Frontend Developer

Tech: React.js, Tailwind CSS, GSAP, LightGallery

Live: webshinez.com

- ▶ Designed and built a responsive, animation-rich company website with a smooth, polished user experience.

Grocery Shop Inventory & Order Management System | Data Structures Course Project

Tech: C++, Linked Lists, File Handling

GitHub: [grocery_shop_management_in_cpp](#)

- ▶ Built a console-based inventory and order management system entirely on singly linked lists instead of static arrays, for dynamic, memory-efficient data handling.
- ▶ Implemented product CRUD, ID-based search, a shopping-cart workflow, end-to-end order tracking, and persistent file handling for products, employees, customers, and orders.

LEADERSHIP & EXTRACURRICULAR ACTIVITIES

Programming & Development Secretary — Green University Computer Club (GUCC)

2026 Executive Committee Member • gucc.green.edu.bd

- ▶ Serving on the 2026 executive committee, leading programming initiatives and maintaining the official GUCC website; personally built and shipped a dynamic Form Builder feature for event registrations.
- ▶ Anchored the Inauguration Program and the Farewell Program on stage, and helped plan, coordinate, and volunteer across other club events.

Web & Dashboard Contributor — GUBCPC

GUB Competitive Programming Community • gubcpc.com

- ▶ Helped build and maintain the GUBCPC website, enhancing the UI and the backend admin dashboard.
- ▶ Volunteered at community events including the July Memorial Programming Contest 2026.
- ▶ 🏆 Achievement: 2nd Place — Green University Inter-Department Programming Contest.
