EDUCATION

B.Sc. in Computer Science & Engineering

Green University of Bangladesh

Session: September 2024 – September 2028

Currently in 2nd Year (Ongoing)

Current CGPA: 3.49

Higher Secondary Certificate (HSC)

Narayanganj College • 2023

GPA: 4.83 / 5.00

Secondary School Certificate (SSC)

Adarsha School • 2021

GPA: 4.83 / 5.00

RELEVANT COURSEWORK

- Data Structures & Lab — A+
- Algorithms & Lab — A+ / A-
- Database & Lab — A- / A+
- Object Oriented Programming — A
- Structured Programming & Lab — A+

TECHNICAL SKILLS

- Languages: C, C++, Python, JavaScript, PHP
- Frameworks: React.js, Next.js, Angular.js, Laravel, CodeIgniter, Flutter (basic)
- Styling: Tailwind CSS, Bootstrap, GSAP, LightGallery, Swiper, Owl Carousel
- Tools: Git, Axios, AJAX, jQuery, Popper.js, Livewire, Yajra DataTable
- Databases: MySQL, MongoDB
- Other: WebSockets, Laravel Verbs, FastAPI, REST APIs

ACHIEVEMENT

🏆 2nd Place

Green University Inter-Department Programming Contest

LANGUAGES

- Bengali — Native
- English — Conversational
- Hindi — Conversational

GUCC

<https://gucc.green.edu.bd/>

PROFESSIONAL SUMMARY

Resourceful Full Stack Developer with hands-on industry experience building scalable, user-centric web applications, and a founder's mindset — currently building EduSelf, a multi-school management software product live in production. Proficient across the full stack, from responsive frontends with React.js, Next.js and Tailwind CSS to robust backends with Laravel and CodeIgniter. Currently a 2nd-year Computer Science & Engineering undergraduate (September 2024 – September 2028, CGPA 3.49) at Green University of Bangladesh, and Programming & Development Secretary of the Green University Computer Club (GUCC). Blends strong Data Structures & Algorithms fundamentals with real-world product delivery and active university tech leadership.

PROFESSIONAL EXPERIENCE

Software Developer

Webshinez Technologies • Narayanganj, Bangladesh

- ▶ Working as a Software Developer, developing and maintaining EduSelf — a multi-school, multi-branch School Management Software — alongside Webshinez Technologies' own client-facing websites.
- ▶ Built Markaj U Talimis Sunnah, a full-stack institutional platform (Vite + React.js frontend, Laravel backend) with Bootstrap, jQuery, Swiper, and Owl Carousel for a rich UI/UX.
- ▶ Contributed to EduSelf LMS, a Laravel-based multi-school, multi-branch system covering authentication, academics, accounting, exams, homework, HRM, and student portals.
- ▶ Developed and maintained dynamic web applications ensuring efficient performance and scalability, spanning both frontend and backend work.

FEATURED PROJECTS

EduSelf — School Management Software (Own Product) | Founder & Full Stack Developer

Tech: Laravel, React.js, TypeScript, Bootstrap, jQuery, Yajra DataTable, REST APIs

- ▶ Designed and built a full multi-school, multi-branch School Management System covering Core, HRM, Accounting, Frontend, Academic, and Exam modules with student dashboards and secure authentication.
- ▶ Now developing a dynamic React + TypeScript frontend module consuming Laravel REST APIs for real-time academic, accounting, and student data with type-safe, reusable components.

GUBCPIC IUPC 2026 — Contest Registration Platform | Full Stack Developer

Tech: React/Next.js frontend, dynamic API integration with GUBCPIC admin backend

- ▶ Built the IUPC 2026 contest website, dynamically connected to the GUBCPIC.com backend via contest slug and API key so admins fully control contest details from a single dashboard.
- ▶ Implemented the integration so admins create a contest on the GUBCPIC admin panel and it automatically drives registration, content, and status on the public IUPC site — no manual syncing required.

GUCC Form Builder & Sponsors Page | Full Stack Developer

Tech: Web platform feature development, Google Sheets API integration

- ▶ Designed and built a dynamic Form Builder for the GUCC website that lets admins create custom event/registration forms (Google Forms-style) and auto-generates a shareable registration link for each form.
- ▶ Integrated the Form Builder with Google Sheets so submitted responses sync automatically for easy tracking and reporting.
- ▶ Built the GUCC Sponsors page to showcase club sponsors and partners on the official site.

CommerceFlow — AI-Powered Multi-Tenant Retail ERP | Full Stack Developer

Tech: Next.js 16, TypeScript, Tailwind CSS, shadcn/ui, Recharts, React Hook Form, Zod, TanStack Table, Anthropic SDK

- ▶ Built a multi-tenant, multi-branch retail ERP combining a customer storefront, role-aware admin dashboard, POS terminal, and inventory management on one layered Service → Repository data architecture.
- ▶ Implemented an AI shopping/business assistant that recommends products and surfaces real sales and inventory insights, using the Anthropic SDK with a local rule-based fallback when no API key is configured.
- ▶ Designed a branch- and role-based permission system (Super Admin down to Cashier/Delivery Staff) enforced centrally in the service layer rather than per page, and covered the core scoping logic with Vitest unit tests.

Grocery Shop Inventory & Order Management System | Data Structures Course Project

Tech: C++, Linked Lists, File Handling

- ▶ Built a console-based inventory and order management system entirely on singly linked lists instead of static arrays, for dynamic, memory-efficient data handling.
- ▶ Implemented product CRUD, ID-based search, a shopping-cart workflow, end-to-end order tracking, and persistent file handling for products, employees, customers, and orders.

GitHub: [grocery_shop_management_in_cpp](https://github.com/grocery_shop_management_in_cpp)

Webshinez Technologies Website | Frontend Developer

Tech: React.js, Tailwind CSS, GSAP, LightGallery

- ▶ Designed and built a responsive, animation-rich company website with a smooth, polished user experience.

LEADERSHIP & EXTRACURRICULAR ACTIVITIES

Programming & Development Secretary — GUCC

Green University Computer Club · 2026 Executive Committee · gucc.green.edu.bd

- ▶ Serve on the 2026 executive committee, leading programming initiatives and development activities for the club, and actively contribute to club projects on the GUCC GitHub organization.
- ▶ Maintain and continuously improve the official GUCC website, including building the Form Builder feature (with Google Sheets sync) and the Sponsors page.
- ▶ Anchored the Inauguration Program and the Farewell Program on stage, and helped plan, coordinate, and volunteer across other club events.

Web & Dashboard Contributor — GUBCPC

Green University Bangladesh Competitive Programming Club · gubcpc.com

- ▶ Helped maintain the GUBCPC website, enhancing the UI and improving the backend admin dashboard.
- ▶ Built the GUBCPC IUPC 2026 contest platform with dynamic API-driven integration to the main GUBCPC admin backend.
- ▶ Volunteered at community events including the July Memorial Programming Contest 2026.

 **2nd Place — Green University Inter-Department Programming Contest**
